Welcome to the Gollum wiki! See the documentation below, or view [screenshots](#) of some of Gollum's features.

**NB: Gollum and GitHub wikis have diverged.** If you are reading this on GitHub, there are thus some very significant differences between the platform you're currently using and Gollum. If you want to test Gollum, give it a quick try by [installing](#) it, or view some of the [screenshots](#). Plans to create a live demo are being tracked [here](#) -- all help is much appreciated!

## Table of Contents:

1. [Hotkeys](#)
2. [Setting page titles](#)
3. [Using subpages](#)
4. [Page sanitization \(security note\)](#)
5. [Gollum tags](#)
6. [Gollum code blocks](#)
7. [Gollum macros](#)
8. [YAML Metadata for Pages](#)
9. [Gollum diagrams](#)
10. [Mathematics](#)
11. [Bibliographies, citations, and footnotes](#)
12. [CriticMarkup](#)
13. [Redirects](#)
14. [Authentication](#)
15. [Miscellaneous Features](#)
